

### **Amendments to the Specification:**

Please make the following amendments to the specification. Material to be inserted in replacement paragraphs or sections is in **bold and underline**, and material to be deleted is in ~~strikeout~~ or (if the deletion is of five or fewer consecutive characters or would be difficult to see) in double brackets [[ ]].

Please replace the paragraph at page 10, lines 6-14, with the following rewritten paragraph:

Fig. 17 is a cross-sectional view, **through the structure shown in Figure 20**, on about the same scale as that employed in Fig. 14, illustrating, selectively (i.e., employed herein variously to picture two different kinds of otherwise similar structure), two different cross-sectional regions present in the building so far mentioned herein – one of such regions being examined from the point of view of looking downwardly at the cross section of an external, upright column and of associated, joined (interconnected) panel structures I that building, and the other region being examined from the point of view of looking along the long axis of an overhead rafter structure, and specifically where such rafter structure joins with two, spaced roof panels that form part of the mentioned building.
